Safety Photos needed: Example of what NOT to do

New Photo Competition at LOGIC: \$200.00 cash on offer

As part of our safety awareness campaign, we would like to receive photos from people out in the field that showcase best-practice in terms of working safely and being safety orientated.

We are offering a prize of \$200.00 cash and a framed copy of your photo. The competition closes on the 10th May 2010. Please email all photos to admin@logicservices.com.au and don't forget to include your name, phone number, and a title for your photo.

We will publish the top 10 photos on our website in the month of May. The winning photo will also be featured in the June edition of the newsletter.

LOGIC Services: Stand L6 at the AOG Exhibition in March

LOGIC Services are taking serious steps towards establishing themselves within the Oil and Gas Industry.

The AOG (Australasian Oil & Gas Exhibition & Conference) is the largest international petroleum expo in the country and will showcase the latest technical challenges and solutions connected with oil and gas exploration, production and transportation.

Michael Jarvis, Director of Commissioning at LOGIC Services said, "We are now focusing our attention on expanding the business throughout Australasia and further afield and AOG provides us with the unique opportunity to network with members from both the local and global Oil and Gas industry".

LOGIC Services will be located at Stand L6, just inside the main entrance. Come and visit Mike Jarvis and Mark Jackson for a coffee and a chat to find out more about the expansion projects.

Add a bottle of 2004 Grange to your wine collection for FREE!

LOGIC Services is generously giving away a 2004 bottle of Grange valued at \$700.00 at the AOG Exhibition.

What's the catch? All you have to do is visit them at Stand L6, and put your business card in the draw. Really, it is that simple!

So don't miss out on your chance to win this fabulous bottle.
(Sorry team, but LOGIC staff are not eligible to win this great prize!)

**Win a
bottle
of 2004
Grange**

(Valued at \$700)

LOGIC Services are expanding in both the services they offer and their staffing levels.

Over the past few months there has been a focus on linking-in to industry associations, local suppliers and developing strategic partnerships that benefit clients and their cost structures.

The recent projects we have undertaken with the Water Corporation have been a success and we are looking to increase our portfolio in the ever-expanding water industry.

By participating in events such as AOG, this can only improve our presence within the local industry and further develop our contacts and standing within the global market of Oil and Gas.

With all the new team members that have recently joined our company, we are well positioned to become even more competitive in the field of E&I Construction, EEHA Inspections and Commissioning both in the local market and internationally.

Update from LOGIC Services: Projects and Developments

LOGIC Services is proud to be involved in a number of high profile projects on several onshore/offshore facilities in the Australian oil and gas industry. This includes the provision of Commissioning personnel on MODEC's Pyrenees FPSO, Ex Hazardous Area Inspection and remedial works on Apache facilities in NW Western Australia and Ex Inspection works on the Black Tip Onshore Gas Facility in the Northern Territory on behalf of Saipem.

- LOGIC are in the process of completing the install and EEHA Inspection and verification of Crane works for the BP Refinery Hazardous installations project.
- LOGIC is undertaking various electrical works upgrades for Sunset Coast Water Alliance in SW Western Australia.
- LOGIC has a dedicated project team on site involved in the supply and installation of E&I works on the Sludge De-Thickening, HV/LV, De-Watering Building and Egg Digester Facility for W2WA at Woodman Point Waste Water Treatment Plant with further opportunities for contract expansion in the future.
- LOGIC have six permanent staff members in the Corporate Office focusing on Quality, Estimating and Project Management for the company.

Beyond Blue

LOGIC Services has chosen Beyond Blue as their nominated charity for 2010 being a not-for-profit organisation that provides research, and assistance, to people suffering from mental illness and depression.

Depression affects one in every four people and is an illness that is not talked about very often. LOGIC Services hope that by supporting Beyond Blue, this will create awareness of the illness and encourage more people to openly discuss this issue.

Safety is a Priority: New Memberships with IFAP, NECA and CCI

LOGIC Services have recently joined three key industry bodies to ensure they are up-to-date with all the latest news and information at both state and national levels for the electrical industry including OH&S, employee regulations and changing legislation.

By linking-in to the newsletters, events, seminars and training opportunities that are presented by all of these organisations, LOGIC Services will always be at the forefront of new developments. This will help position LOGIC Services as a leader throughout the industry because of the access to a large and broad knowledge base.

Mark Jackson, Director of EEHA Inspections at LOGIC Services said "We believe it is important to support local industry bodies and to become an active members".

"We want to be able to empower our employees with the latest information so that they are able to make informed decisions and lead by example when out in the field", Mr Jackson said.

4 new staff members join the LOGIC Services Team

LOGIC Services are rapidly expanding and have recently added four new full-time team members to the corporate office.

Jodi Truslove is the Manager of Sourcing, Supply and Logistics and brings with her, 10 years of experience in the government, mining and construction sectors.

Kevin Connell focuses on Quality Management for LOGIC Services and has recently gained certification as an Internal Auditor. Kevin has over 20 years experience in the Oil and Gas industry throughout the UK and Europe. He is bringing new expertise to LOGIC Services with his background in oil and gas graphics and documentation.

Damien Rioli has joined LOGIC as the Lead Estimator. With extensive experience as a qualified electrician and specialist knowledge in electronics, Damien brings a range of skills and practical experience to LOGIC Services, and to his role as Lead Estimator.

Our most recent team member is Claire James. Claire is our Administration and Human Resources Coordinator and is the face and voice that meets and greets all of our clients.

We warmly welcome all of our new team members to LOGIC Services!

Dampier/Bunbury Natural Gas Pipeline

LOGIC has been commissioned to undertake the E&I installation for the Mainline Valve & Compressor Station Sites for Stage 5B Upgrades on the Dampier/Bunbury Natural Gas Pipeline on behalf of our client, McConnell Dowell.

This project commenced on September 2009 and is nearing completion.

Onshore: Woodman Point Waste Water Treatment Plant

After performing a high quality finish at the Kwinana Waste Water Treatment Plant (KWWTP) LOGIC Services tendered and won the contract for construction of the Woodman Point Waste Water Treatment Plant (WPWWTP) upgrade and additional variation works.

This work commenced in August 2009 and is ongoing. LOGIC Services are providing equipment and labour for this project. W2WA scheduled a stage one completion for Christmas 2009 and LOGIC's Project Manager, Alex Genovese praised his LOGIC site-team for successfully meeting this deadline.

Documentation and Commissioning is presently being attended to by LOGIC Services and W2WA and there are ongoing upgrades to the Egg Shell digester and various other areas within the plant for the construction team.

Fulvio Giachetta (E&I Supervisor) and the LOGIC Services team have reached all the schedule targets set so far and produced a high quality of work.

Offshore: BHP Pyrenees (FSPO)

LOGIC Services have been involved on the FPSO Pyrenees project, which was originally built in Qingdao China.

The vessel sailed down to the Malaysian Ship yards and had a few small upgrades completed there.

LOGIC Services originally completed the Ex Hazardous Area Inspection works & dossiers on the vessel. When the vessel arrived on station in the N/W of Western Australia in Exmouth, our Electrical & Instrumentation Commissioning Team and DCS Engineers assisted in the Start Up of this MODEC / BHP project.
